Cast Iron & Case Harden Steel may turn a reddish color over time; including Winchester Model 94 receivers serial numbers between 2,700,000 and 6,000,000. The following are options available: (1) Do nothing because the color is not objectionable to customer. (2) Apply DuPont's "Teflon" semi-gloss bake on finish. (Note: this finish looks similar to Win. 94 factory finish on receiver.) (3) Apply Craftguard's Guard-Coat finish in flat black color. (4) Apply Graftguard's Guard-Coat PLUS in matte black color. (5) Electroless nickel plate in either bright polish or dull matte polish.

Additional Charges Continued: **Retail Prices** **Invoice Codes**

Economical Customer Prepared Services

This Form May Be Reproduced!

Customer must completely disassemble the firearm and perform all metal preparations including removal of rust, old finish, pits, dings, bulges and dents. Customer will polish or bead blast metal parts and apply protective coating such as gun oil or Brownell's "Hold". DO NOT USE WD-40 because parts will rust. All buffing compounds must be removed by customer prior to Craftguard's acceptance of work. Craftguard will remove protective coating and apply appropriate metal finish, but will not polish or further prepare metal surfaces. "Economical Customer Prepared Services" not available for all firearm finishes.

NOTE: The prices below include return postage and \$300 insurance.
